Process Dynamics, Modeling, and Control

Babatunde A. Ogunnaike, W. Harmon Ray

Process Dynamics, Modeling, and Control Babatunde A. Ogunnaike, W. Harmon Ray

This text offers a modern view of process control in the context of today's technology. It provides the standard material in a coherent presentation and uses a notation that is more consistent with the research literature in process control. Topics that are unique include a unified approach to model representations, process model formation and process identification, multivariable control, statistical quality control, and model-based control. This book is designed to be used as an introductory text for undergraduate courses in process dynamics and control. In addition to chemical engineering courses, the text would also be suitable for such courses taught in mechanical, nuclear, industrial, and metallurgical engineering departments. The material is organized so that modern concepts are presented to the student but details of the most advanced material are left to later chapters. The text material has been developed, refined, and classroom tested over the last 10-15 years at the University of Wisconsin and more recently at the University of Delaware. As part of the course at Wisconsin, a laboratory has been developed to allow the students hands-on experience with measurement instruments, real time computers, and experimental process dynamics and control problems.

From reader reviews:

Staci Eager:

As people who live in the particular modest era should be up-date about what going on or info even knowledge to make these keep up with the era which can be always change and make progress. Some of you maybe will probably update themselves by studying books. It is a good choice for yourself but the problems coming to anyone is you don't know which one you should start with. This Process Dynamics, Modeling, and Control is our recommendation so you keep up with the world. Why, as this book serves what you want and need in this era.

James Robinson:

Now a day people who Living in the era exactly where everything reachable by talk with the internet and the resources within it can be true or not demand people to be aware of each info they get. How individuals to be smart in receiving any information nowadays? Of course the solution is reading a book. Reading a book can help individuals out of this uncertainty Information specifically this Process Dynamics, Modeling, and Control book as this book offers you rich information and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you probably know this.

Kenneth Hoy:

The book with title Process Dynamics, Modeling, and Control contains a lot of information that you can learn it. You can get a lot of profit after read this book. This book exist new understanding the information that exist in this reserve represented the condition of the world today. That is important to yo7u to be aware of how the improvement of the world. That book will bring you in new era of the the positive effect. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Scott Bourquin:

Are you kind of stressful person, only have 10 as well as 15 minute in your morning to upgrading your mind skill or thinking skill even analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your limited time to read it because all of this time you only find reserve that need more time to be learn. Process Dynamics, Modeling, and Control can be your answer mainly because it can be read by a person who have those short spare time problems.
