Routledge Library Editions: Military and Naval History: The Victorian Army and the Staff College 1854-1914 Brian Bond

A pioneering work in British military history, originally published in 1972, this book is both scholarly and entertaining. Although the book concentrates on a single institution, it illuminates a much wider area of social and intellectual change. For the Army the importance of the change was enormous: in 1854 there was neither a Staff College nor a General Staff, and professional education and training were largely despised by the officers: by 1914 the College could justly be described as 'a school of thought' while the officers it had trained were coming to dominate the highest posts in Commands and on the General Staff.
