Frontiers of Knowledge: Scientific and Spiritual Sources for a New Era Douglas Kinney

Frontiers of Knowledge is the story of unfolding developments that are changing our understanding of ourselves and our place in the universe. We are birthing a new era of human knowledge in which our ideas about the nature and source of reality are rapidly changing. Insights from quantum physics suggest that the basis of our physical world is mental-conscious thoughts. With the exploding mysteries of cosmology-labeled dark matter and dark energy-represent 95 percent of the universe's energy and mass. Other discoveries are causing us to redefine our concepts of mind and this elusive thing we call consciousness. All strongly hint that spirituality is the underlying source of everything. Scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge through systematic investigations of unusual phenomena in quantum physics, cosmology, biology, psychology, disease and healing, death, near-death experiences, systematic studies of reincarnation, and spiritual regression information on the nature of the spiritual realm. The last time something comparable occurred was during what historians call the Copernican Revolution, which led to modern Western science. From one perspective, the new era predicted in this book-a revolution in its own right-can be considered the completion of the quantum revolution by defining and explaining the role of consciousness in our universe. An underlying aspect of this coming revolution is the sense that humanity is moving into a new era in which knowledge of the human spirit (the soul part) and non-physical realities is rapidly expanding. This emerging knowledge has not yet been organized into a coherent structure. The primary purpose of this book is to help achieve that goal.
