Groups, Rings, Modules (Dover Books on Mathematics)

Maurice Auslander, David Buchsbaum

Groups, Rings, Modules (Dover Books on Mathematics) Maurice Auslander, David Buchsbaum This classic monograph is geared toward advanced undergraduates and graduate students. The treatment presupposes some familiarity with sets, groups, rings, and vector spaces.

The four-part approach begins with examinations of sets and maps, monoids and groups, categories, and rings. The second part explores unique factorization domains, general module theory, semisimple rings and modules, and Artinian rings. Part three's topics include localization and tensor products, principal ideal domains, and applications of fundamental theorem. The fourth and final part covers algebraic field extensions and Dedekind domains. Exercises are provided at the end of each chapter.

From reader reviews:

April Wages:

As people who live in the particular modest era should be update about what going on or details even knowledge to make these people keep up with the era and that is always change and progress. Some of you maybe will certainly update themselves by studying books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what type you should start with. This Groups, Rings, Modules (Dover Books on Mathematics) is our recommendation so you keep up with the world. Why, because this book serves what you want and need in this era.

William Devine:

Do you one of people who can't read satisfying if the sentence chained in the straightway, hold on guys this particular aren't like that. This Groups, Rings, Modules (Dover Books on Mathematics) book is readable through you who hate those straight word style. You will find the details here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to provide to you. The writer involving Groups, Rings, Modules (Dover Books on Mathematics) content conveys thinking easily to understand by many people. The printed and e-book are not different in the written content but it just different such as it. So, do you even now thinking Groups, Rings, Modules (Dover Books on Mathematics) is not loveable to be your top collection reading book?

Desiree Herdon:

Reading a e-book tends to be new life style with this era globalization. With reading you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire all their reader with their story or perhaps their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors on earth always try to improve their expertise in writing, they also doing some study before they write on their book. One of them is this Groups, Rings, Modules (Dover Books on Mathematics).

Carrie Francis:

Playing with family in a very park, coming to see the coastal world or hanging out with good friends is thing that usually you have done when you have spare time, in that case why you don't try matter that really opposite from that. I activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Groups, Rings, Modules (Dover Books on Mathematics), you are able to enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't understand it, oh come on its known as reading friends.
