In the first part of the book Professor Alexandre Muns discusses the international economic situation in a light-hearted but rigorous conversation with a resurrected John M. Keynes. Alexandre and Keynes analyze how almost all governments and international institutions have employed keynesian tools (higher deficits, stimulus packages, quantitative easing) to foster growth and job creation during the very sluggish and uneven recovery that has followed the Great Recession and global financial crisis of 2008-2010. Although keynesianism is in vogue, Muns also warns about the dangers of not reining in high levels of private and public debt. In the second part of the book, 30 distinguished professionals - including one from each of the top 20 economies in the world by volume of GDP - provide input on the TIDE (Technological Competitiveness, Demography/Ageing Population, Inequality and Energy Security) challenges that all leading economies will have to address in the coming years and decades to varying degrees.
