Translation In Eukaryotes (Telford Press) Hans Trachsel

This book presents an up-to-date review of the mechanisms and regulation of translation in eukaryotes. Topics covered include the basic biochemical reactions of translation initiation, elongation and termination, and the regulation of these reactions under different physiological conditions and in virus-infected cells. The book belongs on the shelf of everyone interested in translation in eukaryotes, including students and researchers requiring comprehensive overviews of most aspects of translation and instructors who want to cover these topics at an advanced level.
