Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series)

Barbara M. Byrne

Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series) Barbara M. Byrne

This bestselling text provides a practical guide to the basic concepts of structural equation modeling (SEM) *and* the AMOS program (Versions 17 & 18). The author reviews SEM applications based on *actual* data taken from her research. Noted for its non-mathematical language, this book is written for the novice SEM user. With each chapter, the author "walks" the reader through all steps involved in testing the SEM model including:

- an explanation of the issues addressed
- an illustration of the hypothesized and posthoc models tested
- AMOS input and output with accompanying interpretation and explanation
- The function of the AMOS toolbar icons and their related pull-down menus
- The data and published reference upon which the model was based.

With over 50% new material, highlights of the new edition include:

- All new screen shots featuring Version 17 of the AMOS program
- All data files now available at www.routledge.com/9780805863734
- Application of a multitrait-multimethod model, latent growth curve model, and second-order model based on categorical data
- All applications based on the most commonly used graphical interface
- The automated multi-group approach to testing for equivalence

The book opens with an introduction to the fundamental concepts of SEM *and* the basics of the AMOS program. The next 3 sections present applications that focus on single-group, multiple-group, and multitrait-multimethod and latent growth curve models. The book concludes with a discussion about non-normal and missing (incomplete) data and two applications capable of addressing these issues.

Intended for researchers, practitioners, and students who use SEM *and* AMOS in their work, this book is an ideal resource for graduate level courses on SEM taught in departments of psychology, education, business, and other social and health sciences and/or as a supplement in courses on applied statistics, multivariate statistics, statistics II, intermediate or advanced statistics, and/or research design. Appropriate for those with limited or no previous exposure to SEM, a prerequisite of basic statistics through regression analysis is recommended.

From reader reviews:

Paula Mendoza:

Reading a reserve can be one of a lot of task that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a book will give you a lot of new details. When you read a book you will get new information due to the fact book is one of many ways to share the information or their idea. Second, reading a book will make you more imaginative. When you reading through a book especially hype book the author will bring that you imagine the story how the personas do it anything. Third, you are able to share your knowledge to other folks. When you read this Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series), you can tells your family, friends as well as soon about yours book. Your knowledge can inspire the mediocre, make them reading a e-book.

Paul Mackey:

In this time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. The particular book that recommended to your account is Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series) this reserve consist a lot of the information in the condition of this world now. That book was represented how does the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. Often the writer made some study when he makes this book. That's why this book appropriate all of you.

Howard Benedict:

Many people spending their moment by playing outside along with friends, fun activity having family or just watching TV all day every day. You can have new activity to invest your whole day by examining a book. Ugh, you think reading a book can really hard because you have to use the book everywhere? It ok you can have the e-book, taking everywhere you want in your Mobile phone. Like Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series) which is having the e-book version. So , try out this book? Let's observe.

Carol Jackson:

Publication is one of source of information. We can add our knowledge from it. Not only for students but in addition native or citizen want book to know the upgrade information of year to help year. As we know those publications have many advantages. Beside most of us add our knowledge, may also bring us to around the world. From the book Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series) we can get more advantage. Don't that you

be creative people? For being creative person must love to read a book. Just choose the best book that ideal with your aim. Don't end up being doubt to change your life with this book Structural Equation Modeling With AMOS: Basic Concepts, Applications, and Programming, Second Edition (Multivariate Applications Series). You can more inviting than now.
